

SEXUALLY TRANSMITTED INFECTION SCREENINGS AND COUNSELING

Do you know what disease prevention is and why it's important? Well, we are here to give you that information. Medicare pays for many preventive services to keep you healthy. These preventive services can find health problems early, when treatment works best, and can keep you from getting certain diseases.

Sexually Transmitted Infection Screenings and Counseling is one of the preventive services that is covered by Medicare.

Who's covered?

People with Medicare who are pregnant and/or certain people who are at increased risk for an STI when a primary care doctor or other qualified primary care practitioner orders the screening tests and provides counseling.

How often is it covered?

Medicare covers these tests once every 12 months or at certain times during pregnancy. Medicare also covers up to 2 individual 20 to 30 minute, face-to-face, high-intensity behavioral counseling sessions each year for sexually active adults at increased risk for STIs. Medicare will only cover these counseling sessions if they're provided by a primary care provider and take place in a primary care setting (like a doctor's office). Counseling conducted in an inpatient setting, like a skilled nursing facility, won't be covered as a preventive service.

Your cost if you have Original Medicare

You pay nothing for these services if your primary care doctor or other qualified primary care practitioner accepts assignment.

If you have any questions regarding this exam or any of the other Preventive Service exams covered by Medicare, please contact us at 1 (888) 601-6334 or at contact@medrecen.com.
